OR? OR ELSE? 

American farmers will produce 14.02 billion bushels of corn and 4.38 billion bushels of soybeans, the top two U.S. crops in value — the U.S. Department of Agriculture said in two reports. While major growing states such as Iowa and Illinois may see smaller harvests because of weather damage, less-prominent of the 29–67 corn-producers, from Pennsylvania to Mississippi, may have record yields. Harvest estimates for both commodities were higher than any forecast made in the 20th Bloomberg survey of analysts, after the ninth-hottest July since 1895 seared crops across the U.S. Corn Belt. Spring-wheat and cotton harvests may also top expectations, the USDA said. A big bearish surprise from the USDA, Bloomberg Intelligence
